1306	Management	Not yet decided	Mahashweta Chakraborty	PTEO	24029001078	12-10-2024	Talent Retention (including impact of new labour codes) in labour intensive industries like aviation: Key to Organizational Growth HRM & Labour Relations are two critical aspects to maintain industrial peace in labour intensive (long hours & overtime) & not financially rewarding Industries (strict salary structure) like Aviation. Aviation operates 24*7 - requires skilled & diligent manpower for exigencies. Key challenge in Aviation (including Ground Handling Agencies - GHA) is Talent Retention with Minimal labour cost HRM tools Employee Motivation Reward and Recognition Job satisfaction. Job Enrichment: Efficient employee rewarded by re-designation as Probationary Supervisor without immediate pay raise Motivates employees, creates a healthy competition and reduces company's cost. Employee Engagement Team building exercises, Monthly Employee Counselling, Feedback Mechanisms, Employee Grievance Handling (quick actions with immediate results) Training & Development - To upscale and refresh skills for lateral transfers create a talent pool alternative for organization of internal hiring vs. lateral hires succession plan Ensuring HR Compliance and effective Union Negotiation bring job security and stability. Need for this research: I have worked as a Deputy General Manager (DGM) Business and HR, in a GHA, responsible for service deliverables for all our clients at Kolkata Airport. I believe I could leverage my industry experience along with extensive research to will be able to	12-10-2029	No	NA

1416	Medical and Health Sciences	Dr.Atul Kulkarni	Kausani Basu	Full Time	24049001006	19-10-2024	I am writing to express my sincere interest in the PhD program at Symbiosis International University. With a genuine passion for both Biotechnology and Nanoscience, coupled with a commitment to staying abreast of emerging trends, I am enthusiastic about contributing to the convergence of these fields at your esteemed institution. During my Master's program, I delved deeper into research, culminating in my thesis project on stimuli-responsive iron oxide nanocarriers for drug delivery system for galangin: synthesis, functionalization, and in-vitro efficacy of lung cancer (A549) under the guidance of Dr. Selvan Ravindran at Symbiosis School of Biological Sciences. So, in my PhD, I want to prepare advanced nanomaterials through synthesis and characterization techniques and the development of adapted theoretical and numerical tools. And also want to develop ultrasensitive devices for point-of-care diagnostic systems like biosensors for lung cancer treatment. The intersection of lung cancer treatment and biosensors is an emerging field with significant potential to improve diagnostics, monitoring, and treatment outcomes. However, several challenges and problems can arise when integrating biosensors into lung cancer treatment sensitivity, specificity, and reliability. Ensuring the long-term stability and reliability of biosensors in varying conditions is crucial. Biosensors need to maintain performance over time and under different environmental conditions. Also, we face some clinical challenges like The presence of other biomarkers or substances in the body can	19-10-2028	Yes	Full Time - SIU JRF

1418	Medical and Health Sciences	Dr. Santosh Koratkar	Komal Ghonse	Full Time	24049001008	15-10-2024	AS A CURIOUS CHILD I HAVE ALWAYS BEEN FASCINATED BY MICRO-ORGANISMS AND THE EFFECT THEY HAVE ON EVERYTHING AROUND US. WITH THE INCREASING EXPLOITATION OF ANTIBIOTICS, THE THREAT OF MULTI-DRUG RESISTANCE HAS NEVER BEEN PREVALENT. I HOPE THAT MY RESEARCH WILL CONTRIBUTE TO THIS GLOBAL CRISIS. I AM APPLYING TO THE AMITY UNIVERSITY DOCTORAL PROGRAM, AS IT IS THE BEST PLACE TO EXPLORE MY RESEARCH INTEREST AND CHANNEL THEM TOWARDS MY LONG TERM GOALS. I BELIEVE THAT MY RESEARCH EXPERIENCE HAVE PREPARED ME TO UNDERTAKE ADVANCED RESEARCH PROJECT, THUS MAKING ME AN EXCELLENT CANDIDATE FOR THIS PROGRAM. I SPEND MY MASTER S DEGREE STUDYING SPECIALIZED SUBJECTS LIKE MICROBIOLOGY, PLANT AND ANIMAL BIOTECHNOLOGY, RECOMBINANT DNA TECHNOLOGY, GENETIC ENGINEERING, OMICS SCIENCES, INDUSTRIAL BIOTECHNOLOGY, ETC. I WANTED TO LEARN MORE ABOUT ADVANCEMENTS IN SCIENCES. FOR THAT, I TOOK UP ELECTIVES ON STEM CELLS AND REGENERATIVE MEDICINE AS WELL AS MOLECULAR MEDICINE AND DIAGNOSIS. IT CONNECTED THE MISSING DOTS RIGHT AWAY AND GAVE ME THE DIRECTION THAT I NEEDED. DURING MY MASTER S PROGRAM, I WAS CO-AUTHORING A REVIEW PAPER ON TUBERCULOSIS MANAGEMENT WITH TRADITIONAL AYURVEDA. THIS EXPERIENCE TAILORED MY SCIENTIFIC WRITING SKILLS AND HAD ME STUNG WITH NEWFOUND CURIOSITY AND FASCINATION WITH DRUG RESISTANCE PATTERNS. IN END.	15-10-2028	Yes	Full Time - SIU JRF	
1419	Medical and Health Sciences	Dr. Anand Shindikar	Kriti Gupta	PTEO	24049001009	21-10-2024	Biomedical Engineering, Bioscience	21-10-2029	No	NA	
1420	Medical and Health Sciences	Dr. Om Prakash	Kriti Joshi	Full Time	24049001010	11-10-2024	My research interests lie at the intersection of environmental technology for waste management, contributing to biodiversity conservation, and encompassing the genetics and population ecology of species. Focusing on how advanced technologies such as bioremediation, thereby aiding the conservation of threatened biodiversity. Thus, understanding the diversity and population dynamics of species is necessary for effective conservation strategies. My interest in genetics focuses on the use of molecular techniques and field work to assess conservation, genetic heterozygosity, population structure, and gene flow in endangered species.	11-10-2028	Yes	Full Time - SIU JRF

(Established under section 3 of the UGC Act 1956)

Re - accredited by NAAC with 'A++' Grade| Awarded Category- I by UGC--

Founder: Prof. Dr. S. B. Mujumdar, M.Sc., Ph.D. (Awarded Padma Bhushan and Padma Shri by President of India)

Sr. No.	Faculty	Research guide	Name of the Ph.D candidate	Mode of Ph.D.(Full Time/Part Time)	Registration Number	Date of Enrollment/Registration	Research Topic	Likely date of Completion of Ph.D.	Availing Fellowship (Yes / No)	Funding Agency of fellowship	Remark
1433	Medical and Health Sciences	Dr. Manikprabhu Dhanorkar	Vishnu Oza	Full Time	24049001025	21-10-2024	Title of my research "Exploring the use of cellulose nanocrystals tagged biochar in wastewater treatment" Considering the growing interest in sustainability and nanotechnology, the use of cellulose nanocomposites have been actively researched for their use in wastewater treatment having properties such as adsorption, absorption, flocculation, membrane filtration, catalytic degradation and disinfection. They are desirable candidates because of their high specific surface area and strength, hydrophilicity, biodegradability and surface functional ion capabilities. Adsorption is an important and economical process for that activated carbon is used which has disadvantages such as it is energy intensive, expensive and emit greenhouse gases. Biochar is known for its attributes such as high adsorption rate, large surface area and more porosity. Both cellulose nanocrystals and biochar have properties of adsorption of organic dyes, heavy metal ions, pharmaceuticals, pesticides, polycyclic aromatic hydrocarbons and biomolecules in wastewater treatment. Both have the sustainable properties. My aim would be to use both of them together and research it's impact in the domain of wastewater treatment. References- Ambaye, T.G , et.al. " Mechanisms and adsorption capacities of biochar for the removal of organic and inorganic pollutants from industrial wastewater" International Journal of Environmental Science and Technology 18.10 (2021) 3213-3294 2. 1718	Engineering	Dr. Rupali Nagar	Kunal Chavhan	Full Time	24079001201	08-10-2024	Title: Metal Oxide Nanomaterials in Nano Sensors: Applications and Advancements Abstract: Metal oxide nano materials have emerged as promising candidates in the field of nano sensors due to their unique physical, chemical, and electrical properties at the nanoscale. This abstract highlights the diverse applications and advancements of metal oxide nano materials in the development of highly sensitive and efficient nano sensors. This review outlines the fundamental properties of metal oxide nano materials, emphasizing their high surface-to-volume ratio, tunable electronic structure, and exceptional chemical reactivity, which make them ideal for sensor applications. The synthesis methods for producing metal oxide nanomaterials, including techniques such as sol-gel, hydrothermal, and chemical vapor deposition, are discussed, underscoring their impact on sensor performance. The utilization of metal oxide nanomaterials in various types of nano sensors, including gas sensors, biosensors, and environmental sensors, is explained. Furthermore, this abstract delves into the recent advancements and innovations in metal oxide nano material-based nano sensors. Strategies involving functionalization, composite materials, and nanostructure engineering are explored, demonstrating improved sensor performance, stability, and selectivity. But still there are challenges to overcome such as scalability, reproducibility, and commercialization of metal oxide nanomaterial-based sensors. In summary, using metal oxide	08-10-2028	Yes	Full Time - SIU JRF
